

BUSINESS DETAILS

ABOUT US:

Shayona Engineering was established in 2010 with a mission to become the most reliable and renowned company for machining, dies & moulds, industrial automation, heavy fabrication, casting, forging, reverse engineering and turnkey project machinery.

We provide innovative and reliable engineering solutions including machinery, automation, and PEB structures. We deliver quality, precision, and performance across multiple industrial sectors mainly:

- **PVC Pipes & Fittings:** PVC Pipes & Fittings, known for their durability, resistance to corrosion, and secure connectivity, are widely used in plumbing, construction, and irrigation systems.
- **HDPE Pipes & Fittings:** Highly durable, flexible, and resistant to chemicals and corrosion, ideal for water and wastewater systems with secure, long-lasting performance.
- **Irrigation Solutions:** Efficient and sustainable systems designed to optimize water usage in agriculture, landscaping, and gardening.
